

## Program Records

<b>About the Program</b>	The Business Administration is a very unique department by relating both for-profit and non-profit organizations and all internal units of those organizations. This richness of Business Administration Department relies on its strong relations with business sub-disciplines such as marketing, production systems, management and human resources, finance and accounting, and numerical methods and also with other disciplines like psychology, law, economics and information technologies. In accordance with the increasing global trade and competition, AGU Business Administration Undergraduate Program aims to train future managers as professionally informed and equipped people who are familiar with international working culture and English, aware of global developments and problems. In this way, AGU provides an education opportunity that will enable its students to work in international markets as well as public or private sector organizations operating on a national scale. In addition, Business Administration Department's students will be able to establish their own businesses by including the entrepreneurship concept in many course contents throughout the learning process.
<b>Program Outcomes</b>	<p>To accumulate knowledge in functional areas, such as marketing, human resource management, operations, accounting and finance, and integrate and apply this knowledge to the overall mission and vision of the firm.</p> <p>To apply critical and strategic thinking to analyze/solve business problems by utilizing information technology and research methods, by acquiring, interpreting, synthesizing data, and then use the results in decision making.</p> <p>To understand the impact of globalization on companies, people and national economics given their different legal, political, and economic systems.</p>
<b>Qualification Awarded</b>	Bachelor's Degree / Business Administrator
<b>Length of Program &amp; Credits</b>	4 years (excluding one year of English Preparatory Program) 240 ECTS
<b>Level of Qualification</b>	First Cycle (Bachelor's) Degree; EQF-LLL Level 6, QF-EHEA Level 1
<b>Mode of Study</b>	Full Time
<b>Field of Study</b>	Business Administration
<b>Admission Requirements</b>	High school diploma; Placed by National Higher Education Exam (YKS) scores; Proof of English proficiency (TOEFL or Abdullah Gül University English Proficiency Exam)  For foreign students, proof the admission requirements that are announced by the university.
<b>Recognition of Credit Mobility</b>	Courses taken outside of the program could be transferred in accordance with the associated principals of the Abdullah Gul University Undergraduate Education and Examination Regulation rules by the respective management board.
<b>Graduation Requirements &amp; Regulations</b>	Student has to complete all courses in the program curriculum with a minimum GPA of 2.00.
<b>Occupational Profiles of Graduates</b>	There is an increasing need for skilled business administration graduates with the developments of trade and business sectors in all around the world. A qualified BA graduate can easily find an upper level job that pays well. Since every sector needs a manager, career opportunities for BA graduates include all sectors. When you graduate from BA you can work in any private sector such as chemistry, automotive, textile, logistics, food, electronics, banking, advertising, service and information sectors or you can start working in public sector. In addition, as a well-educated entrepreneur, you can start your dream business and manage it.

---

Description	This course introduces students to basic concepts and principles of effective business communication as integral to management strategy. The course will include developing a foundation for designing effective messages, from concept to delivery. Students will use strategic communication models to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for that message. Further, because effective group communication is a necessity in today's workplace, the students will learn and practice skills in presentations, interviews, dealing with conflict, and leveraging the power of diversity, at both the individual and cultural level.
Objectives	Developing their skills in professional and interpersonal communication Discovering the challenges in the global job market Introduce how to create business messages, reports, proposals, presentations, and resumes.
Learning Outcomes	<i>By the end of the course, the student will be able to</i>  L01: Demonstrate knowledge about professional and interpersonal communication skills. L02: Demonstrate knowledge about ethical, legal, cultural, and global challenges affecting business communication. L03: Compose and revise accurate business reports, proposals, and messages. L04: Be able to implement course material to real-life examples with effective oral business presentations.

İçerik	Bu ders, öğrencilerin pazar fırsatlarını değerlendirmeyi, pazarlama stratejileri planlarını geliştirmeyi ve etkili pazarlama kararları alma becerisini geliştirmek için düzenlenmiştir. Ders konuları pazar odaklı stratejik planlama, pazarlama araştırması, tüketici davranışı, hedef pazar seçimi, rekabetçi konumlandırma, ürün ve hizmet planlama ve yönetimi, fiyatlandırma, dağıtım ve reklamcılık, halkla ilişkiler, internet pazarlaması, sosyal medya ve satış promosyonu olarak belirlenmiştir. Farklı yöntemler kullanılarak ders, pazarlama konularını işletmeden tüketiciye ve işletmeden işletmeye ürün, hizmet ve kar amacı gütmeyen kuruluşlara uygulanacaktır.

Description	This course is intended to introduce the basic theory, concepts and practice of financial accounting and to enable students to understand information contained in the published financial statements of companies and other organizations.
Objectives	Provide knowledge of the basic theory, concepts and practice of financial accounting. Provide knowledge of accounting cycle. Provide knowledge of using financial statements and financial information to manage and evaluate the results of business operations.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01: Demonstrate knowledge about accounting concepts and principles L02: Demonstrate knowledge about accounting cycle L03: Be able to identify major asset, liability, equity, income and expense items. L04: Demonstrate knowledge about recording basic accounting transactions L05: Be able to Prepare and interpret annual financial statements. L06: Demonstrate knowledge about using the financial statements and financial information to manage and evaluate the results of business operations

Description	The aim of the course is to provide an introduction for individuals who make business decisions and evaluate the performance of business units using data obtained from the accounting system. The course covers the basic issues involved in the design of a cost accounting system, and the role of management accounting in decisions concerning resource allocation and performance evaluation.
Objectives	Learn and apply transactions relating to managerial concepts Learn the types of costs and how they behave in order to calculate cost-volume-profit relationships Learn and apply relevant information for decision making purposes in order to produce financial analyses for a range of decisions such as product-mix, pricing, outsourcing and special orders
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1: Analyze and interpret transactions relating to managerial concepts LO2: Identify costs which may be relevant or irrelevant to a given management decision at hand LO3: Calculate costs in a job order and a process cost accounting system and understand how the costs flow through the system LO4: Understand of the types of costs and how they behave in order to calculate cost-volume-profit relationships LO5: Understand of the types of budgets and be able to prepare operating budgets and capital budgets LO6: Identify relevant information for decision making purposes in order to produce financial analyses for a range of decisions such as product-mix, pricing, outsourcing and special orders

Description	This course aims designing and managing systems with scarce resources by applying scientific approaches. The course enables students to learn the optimal solution for the problems faced in an organization. The course material proves useful for improving and optimizing the performance of an organization. The course covers the following topics: formulating mathematical models for real world problems, introducing the solution methods for mathematical programming models and examining the validity of the models and interpreting the obtained results.
Objectives	<p>This course aims to</p> <ul style="list-style-type: none"> <li>• endow the student with concepts, techniques and tools to design, analyze and improve operational capabilities of an organization.</li> <li>• endow students with the importance of management science in the overall business strategy of the firm.</li> <li>• endow students with problem solving and critical thinking ability to improve organization capability.</li> </ul>
Learning Outcomes	<p><i>By the end of this course, students will be able:</i></p> <p>L01 Identify the need for quantitative managerial decision making tools to improve decision making in a business context and apply the appropriate tools.</p> <p>L02 Achieve an understanding of building blocks of quantitative managerial decision making models.</p> <p>L03 Achieve solving and analyzing quantitative decision making models using spreadsheets.</p> <p>L04 Demonstrate the best solution with respect to changes in the parameters of the problem, and evaluate solutions.</p>

Level/Year	Undergraduate/2
Semester	Spring
Type	Compulsory
Prerequisites	BA 223
Description	The focus is on broad treatment of applications of statistics, concentrating on techniques used in business. This course aims to focus on how to define, collect, organize, visualize and analyze the data for a business problem by applying statistical techniques. Topics include descriptive statistics, parameter estimation, confidence intervals, hypothesis testing, analysis of variance, and linear regression. The course includes computer implementations using available up-to-date statistical software.
Objectives	1. To understand the role of statistics in research and business practice 2. To develop skills in data gathering and analysis 3. To interpret statistical results 4. To obtain sufficient background to support further studies in business applications
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1: do descriptive statistics (summarize data numerically and graphically), LO2: calculate point estimates for unknown parameters of distributions, LO3: compute confidence intervals for unknown parameters of distributions, LO4: perform hypothesis testing with two samples, LO5: construct and interpret linear , multiple regression models, LO6: use a statistical software (preferably MATLAB, Python, Minitab) to carry out the above.

Type	Compulsory
Prerequisites	
Description	The course is designed as an introductory course on basics of microeconomics at undergraduate level. The content includes theoretical information on how economic activities and relations function, the way individuals, households and firms behave and make decisions, factors affecting these decision-making behaviors, and principles of allocation of resources. In addition to these subjects, different types of market structures and workings of these markets are explained and information on current methodologies and approaches is given at beginner level.
Objectives	<ol style="list-style-type: none"> <li>1) Defining main concepts of microeconomics.</li> <li>2) Examining the topic of consumer behaviour.</li> <li>3) Examining the topic of firm behaviour.</li> <li>4) Introducing different types of markets (competitive market, monopoly and oligopoly).</li> </ol>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Define main topics, basic concepts and terminology of microeconomics.</p> <p>L02. Discuss the theoretical background of how people make decisions related to consumption and production.</p> <p>L03. Explain different cost concepts, demand and supply relations, competition and various market structures.</p> <p>L04. Discuss a few example applications of microeconomic theory on related societal issues.</p>

İçerik	Operasyon yönetimi, son derece rekabetçi bir küresel ortamda ürün ve hizmet üretmek için çok sayıda faaliyet ve sürecin entegrasyonunu içerir. Birçok şirket, ürün tasarımı, maliyet veya kalite bazında rekabet edememeleri sonucunda pazar payında düşüş yaşamaktadır. Bu ders, operasyonları yönetsel bir bakış açısıyla ele almaktadır. Operasyonun temel performans ölçütleri (verimlilik, kalite ve yanıt süresi) ve ayrıca bu boyutlar boyunca operasyonların performansını iyileştirmeye yönelik önemli kavramlar dikkate alınmaktadır.

Level/Year	Undergraduate/3
Semester	Fall
Type	Elective
Prerequisites	-
Description	One of the most valuable assets a firm has are the brands it has invested in and developed over time. Although competitors can often duplicate manufacturing processes and factory designs, it is not so easy to reproduce strongly held beliefs and attitudes established in the minds of consumers. The main focus of this lecture, which is brand equity, can provide valuable perspective and a common denominator to interpret the potential effects and trade-offs of various strategies and tactics for the branding concept.
<b>Objectives</b>	(1) Introduce the key concepts in branding. (2) Provide the knowledge about brand equity and its founding dimensions. (3) Provide the knowledge of brand management, how to create and measure. (4) Provide the students better interpret why strong brands are useful
<b>Learning Outcomes</b>	<i>By the end of this course, students will be able to:</i>  L01: Define brand concept and explain why brands are important. L02: Identify the steps in the strategic brand management process. L03: Outline the sources and outcomes of customer- based brand equity. L04: Identify the stages in the brand value chain.

İçerik	Bir firmanın sahip olduğu en değerli varlıklardan biri, yatırım yaptığı ve zaman içinde geliştirdiği markalardır. Rakipler genellikle üretim süreçlerini ve fabrika tasarımlarını çoğaltabilmelerine rağmen, tüketicilerin zihninde yerleşik olan güçlü inanç ve tutumları yeniden üretmek o kadar kolay değildir. Marka denkliği olan bu dersin ana odak noktası, marka kavramı için çeşitli strateji ve taktiklerin potansiyel etkilerini ve takaslarını yorumlamak için değerli bir bakış açısı ve ortak bir payda sağlayabilir.

Level/Year	Undergraduate / 4
Semester	Spring
Type	Compulsory
Prerequisites	To have successfully completed 180 ECTS and to attend 5 activities which are held by AGU Career Office.
Description	This course is designed to give students an opportunity to demonstrate combined knowledge and development in the major. The course will evaluate students' cognitive and intellectual progress in their major and also the overall academic learning experience. The course will provide an opportunity for students to integrate and applied learning from their academic career in a comprehensive manner. This course also provides an opportunity for students to integrate and apply knowledge from their academic studies; through the comprehensive evaluation of core curriculum of finance and accounting, economics, marketing, management, human resource, and all learned fields.
Objectives	Encouraging students to think critically, solve challenging problems, and develop skills such as planning, oral communication, research skills, and teamwork. Encouraging students to connect their projects to community issues or problems, and to integrate outside-of-school learning experiences, including activities such as interviews and scientific observations.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Define a business problem clearly. L02. Observe and understand the differences and the interaction among the sub-units of a business through defining a workable business case. L03. Work autonomously or in a group under supervision. L04. Solve or bring approaches to business problems in a systematic manner. L05. Initiate a business project from start to an end.

İçerik	Dersin odak noktası, yöneticilerin teknolojilerin geliştirilmesini ve kullanımını etkin bir şekilde yönetmesini sağlayan temel kavramlar, modeller ve yöntemlerdir. Amaç, teknoloji yönetimi ve teknolojik yenilik ile ilgili konuların kapsamı ve karmaşıklığı konusunda farkındalık yaratmaktır. Ders, endüstrilerin ve firmaların yeni teknolojilerle nasıl dönüştüğünü, yeni endüstrilerin nasıl yaratıldığını ve hangi faktörlerin inovasyon performansını etkilediğini inceleyerek teknoloji yönetiminin makro konularını içerecek şekilde genişletilecektir.

Description	This course explores tourism management by considering factors influence tourism industry. The course intends to cultivate knowledge and skills of students about tourism management. Moreover, the course introduces the theoretical and practical aspects of tourism economics.
Objectives	Understand tourism management in a different perspective Cultivate knowledge and skills about tourism economics Learn theoretical and practical aspects of tourism management Understand economic and political impacts of tourism
Learning Outcomes	<i>By the end of the course, the student will be able to</i>  L01. Identify the major participants and forces shaping the tourism industry L02. Explain the importance of segmenting the tourism market L03. Explain the importance of intermediaries in the distribution of tourism services L04. Identify and explain the economic and political impacts of tourism

Description	This course covers some introductory numerical methods, which model financial assets' and their derivatives pricing, enterprise valuation and risk management. Students are encouraged to analyze and check their financial ideas in a computational environment during the lecture sessions. Students are expected to gain confidence in their ability to apply computational methods for any their own financial decision-making process.
Objectives	Provide the essentials of portfolio model Apply computational methods for financial decision-making processes.
Learning Outcomes	<i>By the end of the course, the student will be able to</i>  L01. Compare different portfolios at different risk levels L02. Determine evaluation criteria for portfolio performance L03. Measure risk of assets and hedging strategies L04. Execute spreadsheet formulas for portfolio management

İçerik	Bu ders modern bankacılığın temellerinin nasıl keşfedileceğiyle ilgilidir. Bu derste öğrenciler bankacılık mevzuatı türlerini ve bankacılığın temel işlevini kavrama imkânı bulacaktır. Ayrıca, bu ders para politikalarını ve döviz kurlarını da kapsamaktadır Modern bankacılık teorik ve pratik yönleriyle günümüz dünyası ile ilgilidir. Bu ders bankacılık sisteminin modern ve kurumsal bir yaklaşımla anlaşılabilmesi açısından öğrencilere bilgi birikimi ve beceri kazandırır. İçerik: Bankacılık sektörü, bankacılık mevzuatı, para arzı ve faiz oranları, finansal kurumlar, para politikaları ve döviz kurlarında kurumsal değişiklikler.

**COURSE RECORD**

Code	<b>BA 433</b>
Name	<b>Supply Chain Management</b>
Hour per week	3+0(Theory + Practice)
Credit	3
ECTS	5
Level/Year	Undergraduate/4
Semester	Fall
Type	Elective
Prerequisites	
Description	In this course, students learn the strategic importance of good supply chain design, planning, and operation for every firm and understand how good supply chain management can be a competitive advantage, whereas weaknesses in the supply chain can hurt the performance of a firm. We use many examples to illustrate this idea and develop a framework for supply chain strategy. Within the strategic framework, we identify facilities, inventory, transportation, information, sourcing, and pricing as the key drivers of supply chain performance. At the end of the course students will have a fair understanding of the role supply chain management plays in business processes.
Objectives	This course aims to <ul style="list-style-type: none"> <li>• endow the strategic importance of good supply chain design, planning, and operation for every firm</li> <li>• convey how these drivers may be used on a conceptual and practical level during supply chain design, planning, and operation to improve performance.</li> <li>• improve the supply chain management of the firm</li> </ul>
Learning Outcomes	<i>By the end of this course, students will be able to:</i> LO1 Describe the strategic role of a supply chain LO2 Determine the key strategic drivers of supply chain performance LO3 Apply analytic methodologies for supply chain analysis LO4 Develop a framework for supply chain strategy LO5 Identify current trends related to supply chain management

Description	This course provides students with concepts, techniques and tools to design, analyze and improve manufacturing system performance. This course considers the basic manufacturing techniques, modern manufacturing systems and the criteria used to evaluate system performance and combines all aspects of manufacturing enterprises using computer integrated manufacturing methods. Topics covered include assembly lines, transfer lines, flexible manufacturing systems, material handling and transmission systems, and cellular manufacturing
Objectives	This course aims to <ul style="list-style-type: none"> <li>• endow the student with concepts, techniques and tools to design, analyze and improve manufacturing system.</li> <li>• endow students with the role of manufacturing system in the overall business strategy of the firm.</li> <li>• Improve the manufacturing system.</li> </ul>
Learning Outcomes	<i>By the end of this course, students will be able to</i> LO1 Demonstrate the key dimensions of manufacturing system in the overall business strategy of the firm LO2 Describe the interdependence of the manufacturing system with other key functional areas of the firm. LO3 Identify current trends related to manufacturing system. LO4 Measure the performance of modern manufacturing systems LO5 Implement methods to improve / optimize performance.

Code	<b>BA 440</b>
Name	<b>Managerial Communication</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate / 3-4
Semester	Spring
Type	Elective
Prerequisites	-
Description	This course explores key theories and strategies of contemporary organizational communications and designed to help students analyze business communication problems and formulate strategies for presenting the solution clearly, concisely, and persuasively. It enhances the student's professional business writing skills within managerial contexts. Additionally, it recognizes that challenges exist for creating and implementing effective communication both inside organizations (between individuals and groups), and outside organizations (with markets, partners, and influential third parties).
Objectives	To introduce key concepts of communication theory, strategy, and implementation within organizational settings. To develop students' skills in applying these concepts to realistic situations in a variety of workplace environments.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain the historical development of communication as an organizational process affecting internal processes and external relationships. LO2. Describe managerial communication as a component of organizational communication. LO3. Implement concepts for problem solving, conflict management, and negotiation. LO4. Summarize the key strategies for effective written and oral communication internally and externally. LO5. Identify the characteristics of technology that impact and interact with organizational and managerial communication.

Prerequisites	-
Description	This course examines the ways in which cultural differences impact on the process of doing business and managing internationally. The course explores the nature of culture and how cultural differences impact on interpersonal interactions, intergroup interactions and the management of multi-cultural workforces. The course provides a key grounding in the nature of management in the global context by increasing awareness and understanding of the soft skills in international management, particularly those relating to cross-cultural management.
Objectives	Develop the awareness, skills and knowledge about cultures and differences Endow students with concepts, tools and techniques related to cross cultural management. Improve the critical thinking and assessment skills of students in terms of to cross cultural management. Enable students to apply related concepts to real life scenarios.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Infer the importance of cross-cultural management, and the major theoretical and empirical studies which examine the impact of different national cultures on work and employment. LO2. Compare a range of international management practices and how organizational and national culture impacts on work, motivation, leadership, cross-cultural communication and decision-making, negotiation and trust, conflict and dispute resolution and corporate social responsibility. LO3. Have knowledge of comparative management and employment models and their implications for management and employment in different national contexts. LO4. Classify cultural and institutional differences to evaluate the challenges and opportunities of doing business in different countries. LO5. Differentiate cultural difference in interactions with different nationalities.

Gelir yönetiminin temel ilkeleri ve kavramları; kapasite yönetimi, süre kontrolü, talep ve gelir tahmini, indirim, çifte rezervasyon uygulamaları, yer değiştirme analizi, ağ yönetimi ve fiyatlandırma uygulaması bu derste ele alınan konulardır.

**COURSE RECORD**

Code	<b>BA 445</b>
Name	<b>Negotiation and Organizational Conflict Resolution</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate / 3-4
Semester	Fall
Type	Elective
Prerequisites	-
Description	This course provides a comprehensive introduction to concepts in negotiation, interpersonal effectiveness, and organizational conflict resolution. Various types of negotiations including integrative (win/win approach), distributive (win/lose approach) and various iterations of these two extremes will be explored. In addition, communication (face to face, virtual, and verbal/nonverbal), emotion/perception (psychological intangibles), team/multiparty negotiations, international negotiations and cultural differences will be discussed.
Objectives	Describe theories and research related to negotiation and conflict management. Infer the role of communication in conflict, negotiation processes, and the components of conflict that lead to constructive or destructive negotiation patterns. Evaluate the effectiveness and appropriateness of strategies, methods, and responses that are appropriate to a given conflict situation. Recommend effective conflict management communication for a given situation.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Distinguish among different negotiation models and assess the utility of these models and apply them, in a range of contexts. LO2. Engage constructively in integrative negotiation and collaborative problem solving. LO3. Create value through the negotiation process, and garnering a fair share of that value. LO4. Infer, appreciate and address the impacts of values, culture, power, and gender on negotiation. LO5. Identify ways to address diversity and inclusion, in negotiation situations. LO6. Interpret and apply an ESR framework (Ethics, Sustainability and Responsibility) to negotiation situations

Level/Year	Undergraduate / 4
Semester	Spring
Type	Elective
Prerequisites	-
Description	This course is an introduction to the Python programming language for students without prior programming experience. We cover data types, control flow, Object-Oriented Programming, and graphical user interface-driven applications. This course introduces core programming basics including data types, control structures, algorithm development, and program design with functions via the Python programming language. The course discusses the fundamental principles of Object-Oriented Programming, as well as in-depth data and information processing techniques. Students will solve problems, explore real-world software development challenges, and create practical and contemporary applications.
Objectives	Introducing students to learn how to design and program Python applications. Allowing students to understand why Python is a useful scripting language for developers.
Learning Outcomes	LO1: Learning to acquire programming skills in core Python. LO2: Learning to acquire Object Oriented Skills in Python. LO3: Learning to develop the skill of designing Graphical user Interfaces in Python. LO4: Learning to develop the ability to write database applications in Python

Description	New products bring something new to the marketplace, whether it is incremental or disruptive innovation, through costly and risky research and development investments. Most times new products are necessary for company's survival and growth and addressing the needs and wants of consumers have become vital competitive advantage. Given these facts, New Product Development course aims to focus on the processes of new product innovation. Furthermore, this course will provide solid insights for the students who want to understand how firms manage and develop new products.
Objectives	Understand product development process. Screen new ideas for new products. Realize customer needs Provide background on design, architecture, product economies and management
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Identify the key opportunities for generation of new ideas. LO2. Integrate customer needs, product specifications and concept generation LO3. Apply the elements of the product architecture on product change, product performance and product variety. LO4. Explain the terms and tools for better design decisions in the context of design concept

Code	<b>BA 460</b>
Name	<b>Entrepreneurship for Engineers and Scientists</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/ 3,4
Type	Elective
Prerequisites	-
Description	This course aims to provide a hands-on experience to learn modern theories and tools related to entrepreneurial activity and thinking. The course focuses particularly on Engineers & Scientists who would like to start a business that uses a particular technology at its core. Topics covered will include customer discovery, the development of a viable business model, the evaluation and planning of the start-up businesses, alternative go-to-market strategy, intellectual property, and financing. The course will use lectures, directed readings, and guest speakers. Students will be introduced to the basics of entrepreneurship – seeking opportunities for innovative technical solutions to the needs of society and taking these ideas to the market by developing a viable business model, a sound business plan, and a commercialization strategy.
Objectives	Identifying and screening potential business ideas. Being able to develop business ideas into business models. Learning how to examine business assumptions embedded in business models and iterate the model. Gaining a comprehensive understanding of the pivotal role played by technology-based entrepreneurship. Developing the skills and learning how to choose the tools and resources to become a successful entrepreneur.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Develop business models for business ideas. L02. Assess probability of success of the business models. L03. Explain how to develop a business idea into a business venture. L04. Develop skills in ideation, prototyping, and product development. L05. Explain funding sources, financial management, and venture capital.

İçerik	Bu ders finansal kaynakların piyasalar arasında dinamik geçiş ilişkilerini öğretmeyi amaçlamaktadır. Bu bağlamda, dersin yürütücüsü çeşitli finansal piyasalar ve bunların finansal kurumlarla ilgili bağlantıları arasında ilişkileri analitik bir çerçevede açıklayacaktır. Finansal piyasalar tarafında, öğrencilerin türev piyasaları ile birlikte para, tahvil, hisse senedi ve döviz piyasalarını yetkin bir biçimde anlamaları hedeflenmektedir. Ayrıca bu derste, finansal piyasaları çeşitli boyutlarda birbirine bağlayan finansal kurumları inceliyoruz. Ders, sıklıkla gerçek hayattan vaka çalışmaları kullanacak ve öğrencilerin aktif öğrenmeyi teşvik etmek için bireysel ve grup projelerine dahil olmalarına izin verecektir.

**COURSE RECORD**

Code	<b>BA 469</b>
Name	<b>Valuation: Models and Applications</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/ 3-4

Semester	Fall/Spring
Type	Elective
Prerequisites	BA 207
Description	This is a course that will be invaluable to individuals planning a career in finance and still very beneficial for everyone else. The objective of the course is to help students answer the following question: What is it worth? Valuation will be examined for all sorts of assets and with many different models. Upon completing this course students will be able to develop answers to this question for almost any asset. Even though the DCF models will form the basis of the course, many other models will also be reviewed and reconciled. Understanding the factors that determine the value of an asset will also aid managers in understanding the effects of their decisions better.
Objectives	Developing an in depth understanding of valuation and the various models that are used in valuations. Allowing students to choose between the alternative models and carry out real-life valuations and calculate and locate all of the required inputs into the models.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Distinguish the underlying assumptions and factors that affect a valuation. L02. Determine what Valuation approaches are best suited to the task at hand. L03. Estimate and utilize components like Cash Flows and discount rates in actual valuations. L04. Explain the theory behind valuation to allow proper valuations to be done. L05. Evaluate the effects of managerial decisions as a result of better understanding valuations.

Ön Şart	BA 207
İçerik	Dersin amacı, 'Değeri nedir?' sorusunun öğrenciler tarafından yanıtlanmasına yardımcı olmaktır. Değerleme, çeşitli varlık türleri için farklı modellerle incelenecektir. Bu dersi tamamladıktan sonra öğrenciler, herhangi bir varlık için bu soruya cevap verebileceklerdir. DCF modelleri dersin temelini oluştursa da, diğer birçok model de gözden geçirilecek ve bağdaştırılacaktır. Bir varlığın değerini belirleyen faktörleri anlamak, yöneticilerin kararlarının etkilerini daha iyi anlamalarına da yardımcı olacaktır.

ECTS	7
Level/Year	Undergraduate / 4
Semester	Fall
Type	Compulsory

Prerequisites	To have successfully completed 150 ECTS worth of courses in the Business Administration Department.
Description	This course intends to teach the students to get to know working and business life prior to their graduation and therefore to accumulate a certain level of experience before they are employed as graduates. This course focuses on learning and choosing business areas that are compatible with their own skills and interests and seizing the opportunity to observe the real-life applications of the discipline of Business Administration.
Objectives	Learning and choosing business areas that are compatible with learner's skills and interests. Seizing the opportunity to observe the real life applications of the discipline of Business Administration and applying other related disciplines that they have been learned during the coursework as well.
Learning Outcomes	LO1. Implementing the theoretical knowledge to real life problems that might be faced in business environment. LO2. Generating necessary skills and knowledge both personally and related to the professional areas. LO3. Implementing practical knowledge that are not explicitly taught in the curriculum. LO4. Recognizing the skills and experience of working in project groups, and inside a management hierarchy in business life.
