COURSE RECORD

Code	COMP 101
Name	Art of Computing
Hour per week	3+2 (Theory + Practice)
Credit	4
ECTS	6
Level/Year	Undergraduate
Semester	Fall
Type	Compulsory
Prerequisites	
Description	The course aims to teach the essentials of computer programming to students who have little or no background in programming. The students will learn how to write computer programs using SNAP and Java languages. The course will introduce the fundamental concepts and techniques of programming using the graphical programming language SNAP and the contemporary general-purpose programming language Java.
Objectives	01. To develop knowledge of the fundamentals of computer programming. 02. To solve a problem by creating an algorithm. 03. To comprehensively develop programming skills in software design. 04. Apply the concepts learned to a real problem from top to bottom.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Explain what a computer programming language and an algorithm are. L02. Understand how to formulate a problem into an algorithm that can be programmed in a computer L03. Gain an understanding of how computer programs work. L04. Build a script in the SNAP language and write a program in the Java language.
